Incubator-BRT-Test

The procedure of inhibitor tests for milk analysis is one of the essential process steps for the quality assurance in the dairying. Test laboratories and farmers use the efficient quick test for their analysis to evaluate the today's high safety standards in this industry. The operating mode of this heating instrument embraces the constant tempering and incubation of the milk test. The 1-CUBE incubators are equipped with aluminium heating units and an digital temperature control.

- ☼ 230V/50 Hz, 250W
- ☼ Order Details: Factory-selected temperature:: 64,5°
- ☼ Easy to use, experience not necessary
- ☼ Stainless steel construction for easy cleaning.
- ☼ Large field population attests the product's durability and reliability
- ☼ Minimal maintenance
- ☼ A must for the busy laboratory.
